Formulas for Calculating Square Footage

Square or rectangular
Area = LW
L = Length
W = Width
A = 20' x 60'
A = 1,200 square feet

Circle area = $\pi R^2$
$\pi = 3.14$
R = Radius
A = $3.14 \times 20' \times 20'$
A = 1,256 square feet

Triangle
Area = 0.5 BH
B = Base
H = Height
A = $0.5 \times 50' \times 100'$
A = 2,500 square feet
